EXPERIENCE

Fluid Truck

Software Engineer

April 2022 – September 2023

Denver, CO

- Developed a new React Native mobile app from scratch, working closely with a product team and design team to create a user-friendly and feature-rich app to meet the needs of the customers
- Led a committee of engineers to develop and implement comprehensive guidelines, templates, and examples for all Jira item types, improving the quality and efficiency of the technology department
- Collaborated with other engineers to maintain a private NPM repository of locally created component libraries, adding and editing components, and releasing updates to internal teams
- Partnered with a team of cross-functional engineers to develop a new online delivery system that improved our ability to reach and serve new types of customers
- Implemented an automation of the React Native mobile app's build flow using Expo, resulting in a more streamlined and reliable release process for both internal and external users
- Regularly released updates to improved the overall user experience of various customer-facing web apps by developing new features, fixing bugs, and making aesthetic enhancements

Union.Co

Software Developer

March 2021 – April 2022

Charlotte, NC

- Developed features and improvements for the various consumer facing products at using React and Typescript
- Collaborated with an agile team to create solutions that align with the company goals based on business needs and business processes
- Displayed proficiency with web image formats, font loading techniques, and strategies for optimizing Core Web Vitals
- Used expertise in relational database management and optimization to troubleshoot and resolve MySQL database issues
- Leveraged third-party APIs to retrieve and write data using REST and SOAP
- Provided leadership for the rebranding of sites for the company's clientele
